BUILD CAPACITY, GET RESULTS

CLI's on-site courses bring team members and partners into intense exchange and project focused work, which helps bringing strategic issues forward and producing concrete results. Throughout the course, participants partake actively in practical exercises based on their concrete needs, applying practical tools and thereby accomplishing tasks directly relevant to their work. The combination of theory, personal reflection and practical exercises helps building stronger trust and relationships within the group. We will help your team and partners to work on your specific training goal.

EFFICIENT AND FLEXIBLE

We offer a 4 days on-site capacity building program based on the course of your choice of the CLI standard educational program. For the on-site course, the programme will be designed with a focus on project or country specific objectives, including a review and analysis of the project, preparatory interviews with participants, facilitation design and all training material, implementation of the course with two facilitators, debriefing with option of follow-on capacity building, a debriefing report with recommendations, all in close communications with the core team.

Training your team on-site can reduce travel costs and makes your planning flexible. We offer this kind of training for 16+ participants and it scales the more participants you have. Different projects or organisations can also jointly register to have an on-site training together. You can specify the location, dates and number of participants. Two of our expert trainers will be made available to implement your training.
